

Challenge Task: If time permits

Task 1: Test Permission Boundary

In this task you will test the Permission boundary.

Step 1: Assign Administrator Policy to SecUser01

1. **Login** into the **AWS Management Console** using **SecUser01**.
2. In the **AWS Management Console**, on the **Services** menu, click **IAM**.
3. Select **Users**.
 - a. Open **SecUser01**.
 - i. Select **Add permissions**.
 - ii. Select **Attach existing policies directly**.
 - a) In the **Search** type **AdministratorAccess**.
 - 1) Select the **AdministratorAccess**.

Note: Administrator Access gives Full access to All AWS Resources.

- iii. Select **Next: Review**.
- iv. Select **Add permission**.

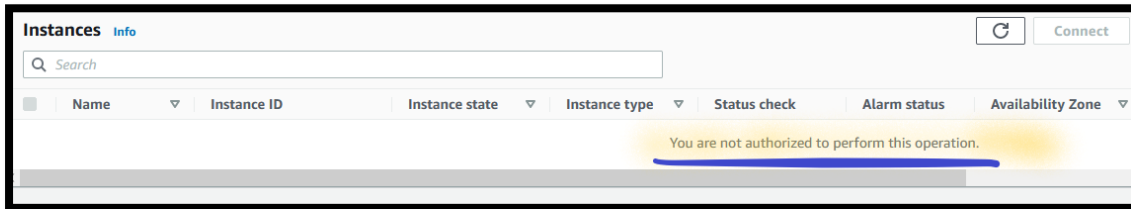

Step 2: Create Amazon EC2 Instance using **SecUser01**

In this task you are testing permissions for the EC2 instances.

4. In the **AWS Management Console**, on the **Services** menu, click **EC2**.
5. Dropdown and select **US East (N. Virginia)** region.
 - a. Select **Instances**.

Note: You can see the **You are not authorized to perform this operation**.

Note: This limitation due to **Permission boundary**. An entity's permissions boundary allows it to perform only the actions that are allowed by both its identity-based policies and its permissions boundaries which is **IAMFullAccess**.

Step 3: Create S3 Bucket using **SecUser01**

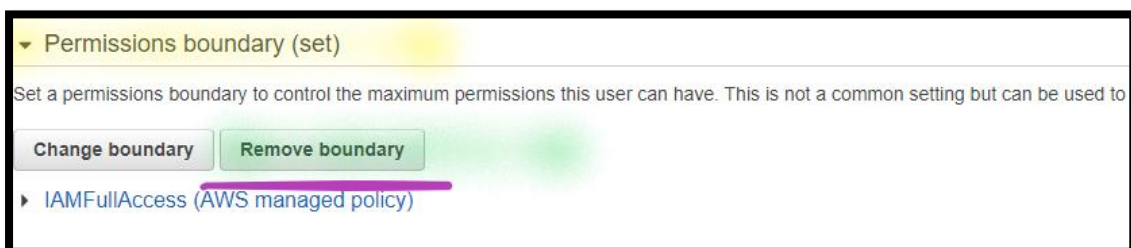

In this task you are testing permissions for the S3 buckets.

6. In the **AWS Management Console**, on the **Services** menu, click **S3**.
 - a. Select **Buckets**.

Note: You can see the **You don't have permissions to list bucket**.

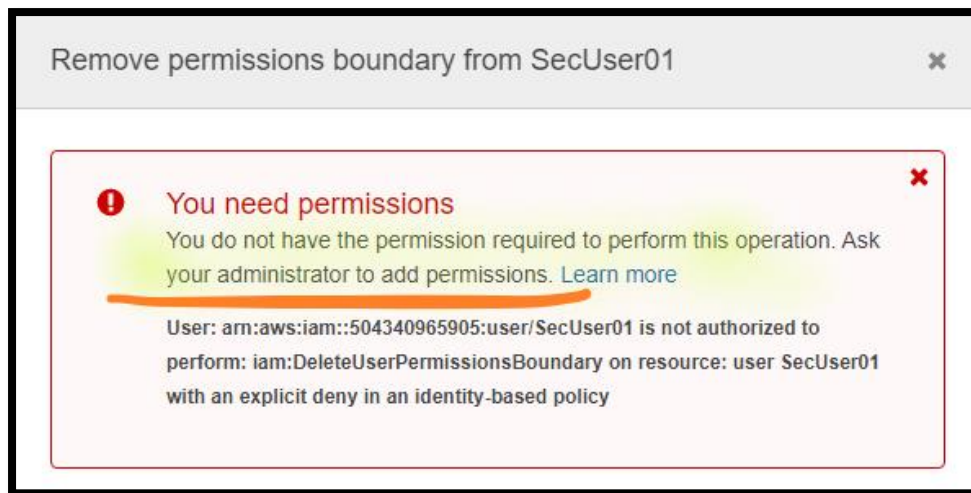

Step 4: Change or Delete Permission Boundary by **SecUser01**

7. In the **AWS Management Console**, on the **Services** menu, click **IAM**.
8. Select **Users**.
 - a. Open **SecUser01**.
 - b. Select **Permissions**.
 - i. Select **Remove Boundary** under **Permission Boundary**.

- a) Select **Remove**.

Note: You can see the **You do not have the permission**.

ii. Select **Change Boundary** under **Permission Boundary**.

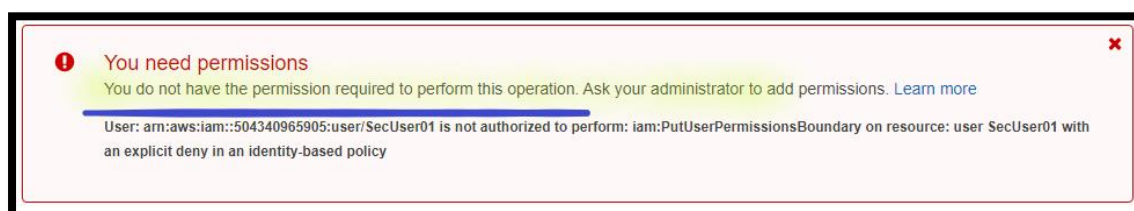

a) In the **Search** type **AdministratorAccess**.

1) Select the **AdministratorAccess**.

b) Select **Change Boundary**.

c) Select **Set Boundary**.

Note: You can see the **You do not have the permission**.

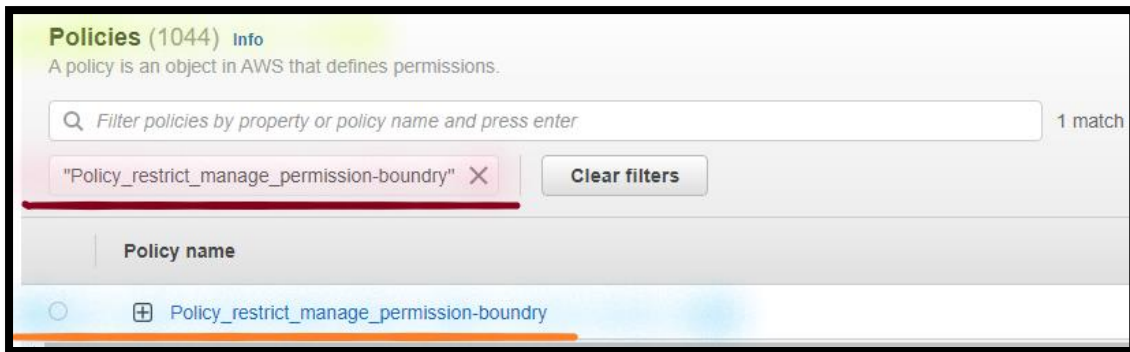

Step 5: Delete the **Policy_restrict_manage_permission-boundry** Policy by **SecUser01**

9. In the **AWS Management Console**, on the **Services** menu, click **IAM**.

10. Select **Policies**.

a. In the **Search** type **Policy_restrict_manage_permission-boundry**.

b. Open the **Policy_restrict_manage_permission-boundry**.

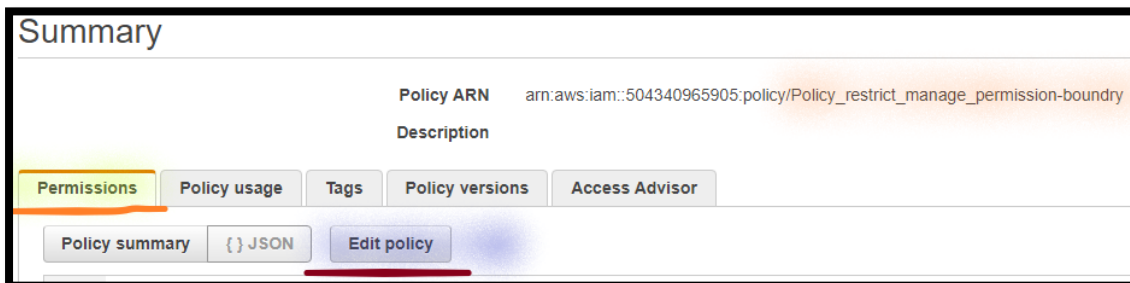

- i. Select **Delete Policy**.
- ii. Select **Delete**.

Note: You can see the **You do not have the permission**.

Step 6: Update the **Policy_restrict_manage_permission-boundry** Policy by **SecUSer01**

11. From the **Policy_restrict_manage_permission-boundry** console:

- a. Select **Permissions**.
- b. Select **Edit Policy**.

- i. Select **JSON**.
 - a) **Change Effect** from **Deny** to **Allow**.

```

1 {
2   "Version": "2012-10-17",
3   "Statement": [
4     {
5       "Sid": "VisualEditor0",
6       "Effect": "Allow",
7       "Action": [
8         "iam:CreatePolicyVersion",
9         "iam>DeletePolicy"
10      ],
11      "Resource": "arn:aws:iam::504340965905:policy/Policy_restrict_manage_permission-boundry"
12    },
13    {
14      "Sid": "VisualEditor1",
15      "Effect": "Allow",
16      "Action": [
17        "iam:PutUserPermissionsBoundary",
18        "iam>DeleteUserPermissionsBoundary",
19        "iam:DetachUserPolicy"
20      ],
21      "Resource": "arn:aws:iam::504340965905:user/SecUser01"
22    }
23  ]
24 }

```

b) Select **Review Policy**.

c) Select Save **Changes**.

Note: You can see the **You do not have the permission**.

Step 7: Detach the **Policy_restrict_manage_permission-boundry** Policy by **SecUser01**

12. From the **IAM** console:

13. Select **Policies**.

- a. In the **Search** type **Policy_restrict_manage_permission-boundry**.
- b. Select the **Policy_restrict_manage_permission-boundry**.
 - i. Select **Actions**.
 - ii. Select **Detach**.
 - a) Select **SecUser01**.
 - b) Select **Detach policy**.

Note: You can see the **You do not have the permission**.

14. **Logout** from the **Secuser01**.
